Website Portfolio: avernoldz.github.io

Summary

Detail-oriented and dedicated developer with experience in software development and system servicing. Eager to contribute technical skills and leadership abilities to help drive company objectives in a dynamic work environment.

Experience

Freelancing

MakinaWorks (Web Design and Development)

- Led the end-to-end design and development of “Makina Works,” a modern one-page landing site for a BPO CAD & Engineering services provider
- Crafted a clean, user-focused UI using Framer, emphasizing clarity, brand professionalism, and strong calls to action to attract potential clients
- Developed the site in WordPress, implementing a responsive layout, performance optimizations, and easy-to-manage backend for client updates
- Collaborated closely with the client to understand technical service offerings and translate them into a compelling digital narrative
- Successfully delivered a conversion-focused website that enhanced the client’s online presence and improved lead generation

Video Editing

- Edited short-form video content (YouTube Shorts, reels) using Adobe Premiere Pro, focusing on fast-paced storytelling, clean transitions, and platform-optimized formatting
- Created engaging thumbnails, overlays, and visual elements using Canva to enhance retention and viewer engagement
- Produced eye-catching, trend-aware content that aligned with client branding and maximized impact in short attention spans

Lead Software Developer

Tarlac, Tarlac City

MyCreative Panda

November 2024 – June 2025

- Led a team of developers in delivering high-quality web applications, ensuring efficient task delegation based on team members' strengths and experience levels.
- Set up and maintained development environments, streamlining workflows and minimizing technical roadblocks.
- Oversaw project timelines, conducted code reviews, and enforced coding standards to maintain code quality and project consistency.
- Handle complex tasks that require advanced skills especially those requiring senior-level proficiency.
- Provide mentorship and guidance to junior developers, supporting their growth and skill development.
- Upload and deploy files from the working area to the actual server, ensuring seamless integration and functionality.
- Perform code reviews to ensure code readability, quality, and adherence to best practices, and refactor code in the codebase when necessary.

Freelancing (Web Development)

Travel Agency Booking System

- Tech Stack:** Vanilla PHP, JavaScript, MySQL, Stripe API, HTML, CSS, Bootstrap
- Key Skills:** Custom backend architecture, payment integration, user flow design
- Designed and developed a complete booking system from scratch using vanilla PHP—demonstrating deep understanding of core PHP without reliance on frameworks.
- Engineered a dynamic routing system to handle predefined travel packages and booking workflows.
- Integrated **Stripe** for secure and responsive online payments, managing transaction status and webhook-based notifications.

- Focused on **clean database design** and **backend performance**, ensuring smooth operation under load.
- Implemented form validation and session handling to enhance UX and security.

Human Resource Information System (HRIS)

- **Tech Stack:** CakePHP, MySQL, HTML, CSS, AngularJs, Bootstrap
- **Key Skills:** MVC architecture, biometric integration, secure user access, real-time data syncing
- Developed a modular HRIS platform using **CakePHP**, following MVC architecture for maintainability and scalability.
- Implemented core HR modules including employee records, attendance tracking, leave requests, and reporting.
- Integrated **ZKTeco fingerprint scanner** for secure, biometric-based attendance logging—ensuring accurate, tamper-proof records synced with the central database.
- Developed a **QR code-based attendance system** as an alternative login method, supporting mobile scanning and remote work setups.
- Applied **role-based access control (RBAC)** to manage permissions for HR admins, employees, and department heads.
- Optimized backend logic and MySQL queries for real-time processing of check-ins, with dashboards and alerts for missed logs.
- Focused on **data security** and **auditability**, ensuring compliance with employee data management standards.

Point of Sale (POS) System

- **Tech Stack:** Laravel, React.js, MySQL, ShadCN
- **Key Skills:** RESTful API design, SPA architecture, hardware integration, real-time data handling
- Developed a fully functional POS system using **Laravel** for backend API services and **React.js** for a responsive, real-time frontend.
- Designed a robust **RESTful API** architecture to handle transactions, inventory updates, and user management efficiently.
- Integrated a **barcode scanner** for product input, allowing seamless and rapid item scanning at checkout, improving cashier efficiency and minimizing manual entry errors.
- Implemented **dynamic inventory tracking**, sales reporting, and role-based access (admin, cashier).
- Used **React state management** (hooks/context) for real-time cart updates and transaction handling.
- Built a clean, modern UI with responsive layouts optimized for tablet and desktop terminals.
- Included detailed logs and audit trails for accountability and system reliability.

Mahoganymodels.com

- Conducted routine website maintenance to ensure consistent performance, fix technical issues, and improve user experience
- Optimized web assets and images by minimizing file sizes, using next-gen formats, and specifying dimensions to reduce layout shifts and enhance load speed
- Improved accessibility and readability by adjusting contrast ratios and refining visual presentation across devices
- Integrated web analytics tools to track visitor behavior and generate insights for data-driven improvements
- Established secure backup processes by storing site files on Google Drive for reliable recovery and version control

Gungamers.com

- Restored and archived website versions, ensuring safe rollbacks and version control while developing a new, updated site layout
- Built and maintained custom WordPress pages using HTML/CSS, with regular content updates and performance optimizations
- Established automated backup routines via Google Drive and implemented SSL certificates through WordPress and cPanel for enhanced site security
- **Delivered client-ready documentation**, including clear, step-by-step guides for managing media content and performing basic site tasks

Junior Software Developer

1630 Le Grand Ave, Taguig, Metro Manila
April 2022 – March 2023

Atos

- **Completed intensive bootcamp training** in **Java, Spring MVC, and ReactJS**, establishing a strong foundation in full-stack web development
- **Built and enhanced web applications** using **ReactJS, Material UI**, and **Ant Design**, focusing on responsive design and user experience
- **Collaborated with development teams** on feature improvements, conducted code reviews, and contributed to scalable front-end solutions
- **Pursued ongoing self-paced training** in modern web technologies to continuously expand and update technical skills

Graphic Artist

Sherwood Place Taft Ave, Malate Manila
February 2020 – March 2022

E3 Print Hub

- Designed various graphics including logos, t-shirts, invitations, and posters.
- Collaborated with teams to ensure designs meet client specifications and media requirements.
- Conduct comprehensive testing of graphics on multiple media formats to ensure consistent quality and functionality.
- Print services for a variety of items such as tarpaulins, stickers, t-shirts, mugs, documents, and large formats.

Education

Nueva Ecija University of Science and Technology (N.E.U.S.T.)

BS in Information Technology (Major in Web Application Programming)
Cabanatuan City, Nueva Ecija 2015 – 2019

Trainings and Certifications

- CSS NC II
- Trainers Methodology I
- Get Certified in Leadership Communication Skills
- Effective Leadership Skills

Skills

Languages: HTML5, CSS3, JavaScript, PHP
Frameworks & Libraries: React.js, AngularJS, VueJs, Laravel, CakePHP, Bootstrap, Tailwind CSS,
Databases: MySQL, Microsoft SQL Server
Design & Media Tools: Adobe Photoshop, Adobe Premiere Pro, Canva
Version Control: Git, GitHub
CMS & Website Builders: WordPress, Framer, Figma
Web Hosting & DevOps: FileZilla, SiteGround, cPanel
